Digital Surveillance System Support

Office: 615-220-2311
Mobile: 615-804-2239

System Overview

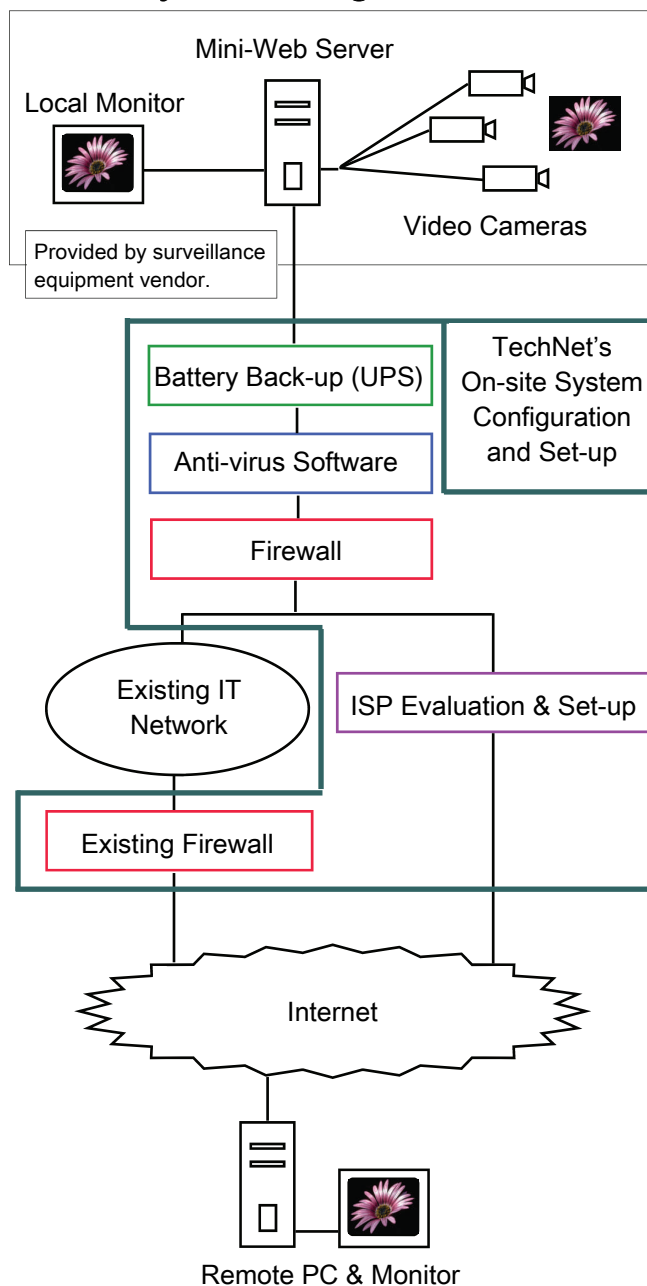

TechNet is a full service off-site IT support provider that offers digital surveillance system support as one of its specialties. By providing essential protection against power surges and outages, viruses, worms and hackers, TechNet can secure your video surveillance as a stand alone system or configure it to function smoothly with your existing firewall and IT network. This ensures secure access to the live or stored video from a remote location.

ISP options to determine what is appropriate for your system

and is affiliated with a national network of technicians available to install and configure the system at any U.S. location.
